Niobium Pentoxide Granules

❖ Product Introduction

Niobium pentoxide (Nb_2O_5) granules are high-purity inorganic oxide granules with a pale yellow or white crystalline appearance. They have a stable crystal structure and good chemical stability. They are insoluble in water and common organic solvents, with a high melting point and excellent thermal stability. The granules also exhibit controllable particle size and favorable sintering activity.

❖ Product Characteristics

1. High purity, uniform particle size and narrow size distribution
2. Excellent thermal stability and stable chemical properties
3. Controllable crystal phase and good sintering activity
4. Insoluble in water and most organic solvents, low impurity content

❖ Product Specifications

Product ID	Formula	Purity	Size
410800GN001	Nb2O5	99.99%	1-3 mm, Black/White
410800GN002	Nb2O5	99.99%	3-6 mm, Black/White
410800GNC01	Nb2O5	Customized	Customized

Chemical Compositions (ppm)							
Purity	**Ta**	**Si**	**Cr**	**Al**	**Fe**	**Ti**	**Mn**
99.99%	≤25	≤25	≤5	≤5	≤10	≤5	≤10
Note: The purity values shown are calculated by subtracting the sum of selected measured elemental impurities from 100%. These values do not represent the result of a full elemental analysis.							

❖ Typical Applications

Niobium pentoxide (Nb_2O_5) granules are widely used in dielectric ceramics, optical coating materials, photocatalytic systems and sputtering target raw materials.

❖ Packaging

Outer packaging: carton or fiber drum.
Inner packaging: double vacuum-sealed bags.
Packing specification: 1 kg/bag or 25 kg/drum.
Customized packaging is available upon request.

❖ Storage

During transportation and storage, avoid moisture, contamination and direct sunlight. Keep away from fire sources and corrosive substances. Use the bag as soon as it is opened. The shelf life is no more than 24 months from the production date.

❖ Custom specifications are available, including

- Higher purity
- Customizable in a wider range of sizes and shapes
- Customizable colors

❖ Cautions

This product is harmful if swallowed or inhaled, and may cause skin and eye irritation. Inhalation may irritate the respiratory tract; avoid inhalation. We recommend that customers inform us of their intended use before purchasing to ensure proper product use.
